CICICOM joins LoRa Alliance®

Press Release

Athens, Greece – March 30th 2021

Cicicom announces its membership in LoRa Alliance®. Becoming part of a fast growing non-profit organization dedicated to promoting the interoperability and standardization of technologies associated to Low Power Wide Area Networks (LPWAN) through the development and promotion of the LoRaWAN® open standard. This membership will allow Cicicom to advance the deployment of innovative, sustainable, efficient and secure total IoT solutions around the world.

About Cicicom

ALL-IN-ONE IoT SOLUTIONS

Cicicom is a company based in Athens, Greece that specializes in All-In-One IoT solutions, leveraging Low-Power Wide Area Networks (LoRaWAN® & Nb-IoT). Such solutions provide powerful functionalities for data collection, monitoring, and insights generation for a number of assets, across multiple industries, using ready-made or any other customized sensor. The end-to-end solutions include IoT hardware, gateways, a cloud server, a robust smart IoT platform and mobile apps. Cicicom's range of products includes a smart parking sensor that enables driver/vehicle identification and MID certified water meters with integrated step valve.

Use cases include water-metering, parking violation monitoring, real-time parking management, smart lighting and smart waste management. Using practical and extensive experience in the IoT sector, Cicicom's platform can be customized according to any project requirements and integrate all kinds of LoRaWAN® or Nb-IoT sensors. The current customer base is mainly in Europe and it recently started exploring business opportunities in the Middle East and U.S.A.
