

Press release, 9-5-2023

HBI Bisscheroux presents emergency lighting as LoRaWAN device

Sittard-Geleen, Netherlands, 9th April 2023 - HBI Bisscheroux bv, manufacturer of intelligent lighting solutions for public spaces, proudly presents the first LoRa Certified emergency lighting. This makes it possible to remotely manage emergency lighting fixtures 24/7 without the need for on-site inspection. This greatly increases safety in a building, while significantly reducing maintenance costs.

LoRaWAN emergency lighting luminaires automatically transmit the results of function and autonomy tests carried out. They keep the operator informed daily about their condition in general and that of the batteries and light source in particular. Incidents such as a mains power failure are noticed immediately. The installer can thus remotely recognise emergencies and detect faults in an electrical installation or in a luminaire.

Wireless management fits into a sustainable and circular economy. Circular is not just about recycling. It is also about using products optimally with a long lifespan. Repairing instead of replacing. With the data coming from luminaires, you can make maintenance predictable and extend the lifespan. Wireless management is also excellent for combining with new innovative pay-per-use services such as Light as a Service (LaaS).

About HBI Bisscheroux bv

As a Dutch manufacturer of emergency lighting, HBI Bisscheroux bv learned to use light as efficiently as possible for safety. In response to market demands, it broadened its scope towards intelligent lighting solutions for public spaces. Porch and gallery luminaires. Lighting for stairwells, basements and car parks. Equipped with smart light and movement sensors and, if required, with emergency lighting. Solutions that serve people and the environment. Solutions where safety and comfort go hand in hand with energy saving and sustainability. Made possible by intelligent technology and high-quality materials in an all-encompassing design. Based on 45 years of experience. HBI Bisscheroux bv is founding partner of Sqippa. For more information visit www.hbi-lighting.com and www.sqippa.com
