

Kerlink's Robust Wirnet™ Station Powering Smart Solutions at Popular French Ski Resort, La Clusaz

Local Private Network Designed to Improve Efficiency & Safety
And Enhance Visitor Satisfaction

PRESS RELEASE

Thorigné-Fouillard, France – Dec. 9, 2021, 6:00 p.m. CET – **Kerlink** (AKLK – FR0013156007), a specialist in solutions dedicated to the Internet of Things (IoT), is helping to take the IoT to the high country with a LoRaWAN® network deployed at La Clusaz, one of the most popular ski resorts in the French Alps.

Installed with Kerlink's longtime partner, Adeunis, the network is powered by [Kerlink's Wirnet™ Station](#), a robust, high-performance and highly reliable outdoor LoRaWAN® gateway for smart public and private IoT networks.

The network will be used to help resort managers implement a **variety of smart-facility programs** such as ski lift operation, monitoring refrigeration systems in mountain restaurants during the off-season, and managing occupancy in cabins to optimize the resort's emergency-response plans.

In addition to improving operational efficiency, these steps will **boost resort-staff reactivity** to visitors' needs and assure visitors and skiers of a safe and satisfying experience.

By delivering these operational and efficiency features, the network also will support the resort's goals of **reducing maintenance costs** and complying with **health and safety regulations**.

"Kerlink's Wirnet™ Stations, and its successor, the [Wirnet™ iStation](#), which are simple to install and flexible for operators to use, are ensuring IoT network performance and robustness in a broad diversity of demanding environments, including a desert in the Middle East, the monsoon climate in India, and on the side of Mount Etna, Europe's most active volcano," said Stéphane Dejean, Kerlink CMO. "At La Clusaz, our industry-leading gateway technology will enable this mountain resort to increase efficiency and visitor safety whatever the conditions outside may deliver."

With 20 years of experience in designing and providing wireless communications systems, [Adeunis](#) specializes in smart-industry, smart-building and smart-city solutions for the Internet of Things. The La Clusaz network also is supported by [API-k Telecommunications](#), a French company dedicated to helping customers capitalize on the benefits of LoRa® networks.

LoRa Alliance® and LoRaWAN® are marks used under license from the LoRa Alliance®.

About Kerlink

Kerlink Group is a leading global provider of end-to-end connectivity solutions for designing, deploying, and operating public & private low power/wide area (LPWA) Internet of Things (IoT) networks. Its comprehensive product portfolio includes industrial-grade network equipment, best-of-breed network core, operations and management software, value-added applications and expert professional services, backed by strong R&D capabilities. Kerlink specializes in enabling future-proof intelligent IoT connectivity for three major domains: Smart City & Quality of Life – urban operations, utilities & metering, retail & public places, infrastructure & hubs, health; Smart Building & Industry – buildings & real estate, industry & manufacturing, asset monitoring & tracking, and Smart Agriculture & Environment – precision agriculture, cattle monitoring & farming, environment & climate, and wildlife protection. More than 140,000 Kerlink installations have been rolled out with over 350 clients in 70 countries. Based in France, with subsidiaries in the US, Singapore, India and Japan, Kerlink is a co-founder and board member of the LoRa Alliance® and the uCIFI Alliance™. It is listed on Euronext Growth Paris under the symbol ALKLK.
