# Professional
Public Server

LORIOT expands its global LoRaWAN® Public Infrastructure with three new regional Professional Network Servers. The Servers are exclusively dedicated to Professional users and include a 99.9% SLA, new features and four available connectivity plans.

Thalwil, Switzerland – 11th December 2019 – LORIOT deploys 3 regional Professional Public Servers to expand the largest LoRaWAN® public infrastructure worldwide. The new Professional Public Servers will support three main regions Europe, North America and Asia-Pacific – and will be dedicated exclusively to Professional Users offering a 99.9% SLA, built-in redundancy and 4 connectivity plans.

With a new total of **16 geographically distributed public servers**, LORIOT operates the largest LoRaWAN® public infrastructure available worldwide. The **3 new regional servers** announced today have been deployed in Oregon (US3 PRO), the Netherlands (EU4 PRO) and Singapore (AP4 PRO) to offer low latency connectivity to professional users.

LORIOT launches a new SaaS business model with monthly pricing and advanced features specifically built for business customers:

- Full-featured LoRaWAN® network server
- 99.9% up-time guarantee
- Unlimited number of gateways & messages
- Organization - multi-tenant team environment
- 4 plans from 500 up to 2.500 devices

"This service was created by listening to our customers. Our public server freemium model based on pay-per-use pricing was no longer enough for some of our customers who were asking us for more. An uptime guarantee, advanced features such as the ability to manage teams and a certain price. We've already tested it on the market with great feedback and are now ready to launch it on a global scale." Explained **Julian Studer**, LORIOT Co-Founder & COO/CFO.

The LORIOT Professional Public Servers have been designed and engineered for the needs of professional users to scale from small networks to large operations.

Teamwork, Security, Performance, Reliability, Flexibility and Growth.

Unlimited gateways and messages with 4 plans that enable our customers to build their LoRaWAN® networks keeping low the operating cost and scaling up only when needed:

- **START**: up to 250 devices
- **BUILD**: up to 500 devices
- **GROW**: up to 1.000 devices
- **SCALE**: up to 2.500 devices

"We are very excited about the launch of this offer that we are sure will have a great response in the market. In defining the plans we thought about the needs of a startup that must be able to guarantee its first customers the reliability of the solution but at the same time can not afford the costs of a private network server. We imagined following its growth and so the names of the 4 packages were born." added **Yannik Kopp**, LORIOT Head of Sales and Business Development.

ABOUT LORIOT AG

LORIOT is a global IoT company providing long-range infrastructure for the Internet of Things.
Due to a unique positioning in the LoRa® ecosystem as both software provider and network operator, we are able to provide one of the most powerful and complete solutions in the market.
Our core product is a software for scalable, distributed, resilient and secure operation of LoRaWAN® networks and end-to-end applications that dramatically reduces time to market for our clients.
We offer the network infrastructure to set up, operate and maintain a radio network, integrate sensors and communicate with them over a secure and reliable connection.
Already operating in over 130 countries worldwide, LORIOT is one of the leading LoRaWAN® network solution providers.
Our vision is to enable IoT in every corner of the globe, transform production processes and people's lives for the better.
