

**Minol ZENNER Group exhibiting as Silver Sponsor @ #TheThingsConference -
Amsterdam 30th&31st January 2020**

Minol ZENNER Connect GmbH is the leading LoRaWAN[®] network provider in Germany. Not only have we built and constructed a private LoRaWAN[®] network, but we also operate and maintain this network comprising more than 5.000 gateways, as well as supporting more than 800.000 deployed devices.

This deployment demonstrates the excellent scalability, flexibility and robustness of LoRaWAN[®]. As a Contributor Member of the LoRa Alliance[®], we proactively support the development of the de facto open IoT standard within our core markets: Smart Buildings, Smart Cities and Smart Utilities.

We, as part of the Minol ZENNER Group and together with our business partners, offer numerous additional services for all your IoT requirements: IoT consultancy, system integration, network planning and end-to-end solution completion enablement. In our newly IoT Shop Sensors & Solutions launching 30th of January, customers are able to select from the best LoRaWAN[®] IoT devices, meters and gateways, provided not only by ZENNER but also by more than 30 different suppliers.

Additionally, we offer several “out of the box” “plug & play” IoT solutions at the Switzercloud or ZENNER Cloud. We supply you with everything from sensors to data for your visualisations to new analytical tools. Please feel free to discover how we can help and support your LoRaWAN[®] ambitions or simply drop by and have a chat with our LoRaWAN[®] experts at our Minol ZENNER Group booth at #TheThingsConference. We are looking forward to welcoming you.
