

SenRa Offers Free LoRaWAN® Network to Fight COVID-19

NEW DELHI, India – April 29, 2020: As the Coronavirus continues to wreak havoc across the globe, cities around the world are starting to leverage technology to help support essential services providers, emergency responders, and local law enforcement in their fight against the virus. In an effort to contribute to the fight, **SenRa**, a PAN India LoRaWAN® network provider has announced free LoRaWAN Network until the end of 2020 for their customers in India who are working on deploying IoT solutions which will assist in the fight against COVID-19.

In addition to the free network offering, SenRa is actively working with partners to make COVID-19 ready solutions leveraging their IoT Analytics platform, **Ginjer** for providing real-time insight on connected devices used on the frontline. SenRa invites companies interested in collaboration, to send their ideas and solution proposals to info@senraco.com.

“We are proud to support the heroes who are risking their lives to keep citizens safe”, said SenRa CTO Kush Mishra. “We all need to work together and faster to co-create solutions that can support our fight against this pandemic.”

About SenRa

SenRa, a contributing member of the LoRa Alliance®, is a PAN India Low Power Wide Area Network Provider (LPWAN), specifically LoRaWAN®, for the Internet of Things (IoT) and Machine to Machine (M2M) solutions and applications. SenRa is currently deploying LPWANs throughout India for projects which require secure, reliable, long distance communication at low cost. SenRa is working with global partners to deploy smart solutions across many IoT segments in India. For additional information visit: <https://senraco.com/>.
