First, unscrew the 4 screws, open the top-cover

1. Place JUMPER from OFF-Position to ON-Position
   The device is now in deep-sleep

2. Hold a strong Neodym-Magnet near to the REED-Switch in order to wake up the device from deep-sleep
   The device is now started

3. If you want to return the device to deep-sleep, hold the magnet again near to REED-Switch
   The device is now in deep-sleep
