Airgain to Exhibit with LoRa Alliance™ at Mobile World Congress Shanghai 2017

San Diego, CA, June 26, 2017 – [Airgain, Inc. \(NASDAQ: AIRG\)](#), a leading provider of embedded antenna technologies used to enable high performance wireless networking, today announced its participation in the product display at the [LoRa Alliance™](#) booth at [Mobile World Congress \(MWC\) Shanghai](#) from Wednesday, June 28 through Friday, June 30, 2017.

Airgain is a member of the LoRa Alliance, a comprehensive and fast-growing LoRaWAN™ ecosystem in the IoT sector. In addition to other Alliance members, Airgain will showcase embedded and external antennas for indoor and outdoor applications that support frequency bands utilized by the LoRaWAN protocol, such as 470-510MHz for China, and 868-928MHz for international applications.

“We’re thrilled to showcase our innovative antenna solutions at MWC Shanghai,” said Jacob Suen, Airgain’s Senior Vice President, Worldwide Sales. “Working with the LoRa Alliance has provided an opportunity for collaboration with some of the best and most innovative partners in the industry. This is a great opportunity for OEMs and developers of LoRa compliant devices, such as gateways and sensors, to talk to Airgain about LoRa antenna solutions for optimal coverage and ease of integration within their devices.”

MWC Shanghai 2017 will feature over 650 companies and explore the latest mobile trends and topics. The conference founder, the Global System Mobile Association (GSMA), expects 65,000+ attendees, including consumers and professionals from various sectors of the broader mobile ecosystem.

About Airgain, Inc.

Airgain is a leading provider of embedded antenna technologies used to enable high performance wireless networking across a broad range of home, enterprise, and industrial devices. Our innovative antenna systems open up exciting new possibilities in wireless services requiring high speed throughput, broad coverage footprint, and carrier grade quality. Our antennas are found in devices deployed in carrier, enterprise, and residential wireless networks and systems, including set-top boxes, access points, routers, gateways, media adapters, digital televisions, and Internet of Things (IoT) devices. Airgain partners with and supplies the largest blue chip brands in the world, including original equipment and design manufacturers, chipset makers, and global operators. Airgain is headquartered in San Diego, California, and maintains design and test centers in San Diego, Cambridge, United Kingdom, and Suzhou and Shenzhen, China.
