

iiote and FUKTAB announce collaboration to expand the IoT solution SenseloT

Gothenburg 2018-05-07

iiote announce collaboration with Fuktab AB for the previously launched IoT-solution SenseloT that enables monitoring of moisture and mold in real estate using a system based on the LoRaWAN™ standard.

SenseloT have been systemized with moisture and building construction industry experts and multiple test-installations have been performed. The collaboration with FUKTAB enables iiote to offer additional services such as installation, monitoring of data and site inspection when an alarm is received. FUKTAB have long experience of moisture and water damage and is a market leader in the industry and work closely with insurance companies, property owners and construction companies.

- We believe the use of new technologies that our expert partner iiote masters will lead to large savings in moisture and mold damages. There is a need to be able to monitor moisture levels in multiple locations that simply have been difficult or too expensive with current systems available today. We are certain that we now can help thousands of customers to reduce inconvenience and SenseloT can lower the damage cost and keep high sense of security, says Patrik Haglund CEO Fuktab AB.

- Robert Spertina CEO of iiote declares we are very happy and proud to announce our collaboration with FUKTAB as this complements the SenseloT offer in a unique way. iiote can now include moisture monitoring from one of the best experts on the market, and if necessary, make on-site inspections. The offering can additionally be customized to fully support other customer needs. SenseloT will help to minimize water damages that according to the Swedish Vattenskadecentrum (an organization with the insurance companies and industry experts as members) costs property owners more than 100Mkr SEK weekly!

iiote contributes to Sweden's goal to be the best in the world to use the potential of digitalization.

iiote - make sense of IoT

About iiote AB

iiote work with companies, organizations and municipalities in implementing IoT in their business, from analysis need and strategy to planning, implementation and system integration. iiote has expertise in IoT, IT and Telecom, combined with industry-specific skills from the construction, machinery and automotive industries. iiote integrates solutions that drive the development of simple and innovative IoT in the community. This is enabled by radio systems that use low-energy technology, Low Power Wide Area Networks (LPWAN).
