

QuaeNet and myDevices Partner to Make Commercial Refrigeration Solutions Available in Canadian Market

Oakville, ON – June 4, 2018 – QuaeNet Inc., is announcing a partnership with US-based organization myDevices, Inc. Jointly, both parties will deliver cold-chain management solutions for restaurants, hospitals and pharmacies.

Canada's strong food services industry is also tightly regulated with Government requirements to monitor and report refrigeration unit statistics, and this new partnership has an abundance of opportunity. The myDevices' end to end solution, utilizing QuaeNet's Canada-wide LoRAWAN™ based network, will allow restaurants, pharmacies and, hospitals to better monitor and manage their refrigerators and deep-freezing units.

This solution will allow automated temperature monitoring, eliminating human errors and manual work. It will also provide alarm reporting, hence allowing safer deliverables.

“We are happy to partner with myDevices to bring such a solution to the Canadian marketplace,” Ossama Bessada CEO of QuaeNet Inc. comments. “QuaeNet remains committed to offering more solutions over its efficient and reliable network to benefit more and more Canadian businesses.”

“With IoT in a Box commercial refrigeration solutions, SMBs and Enterprise customers can monitor vital business assets efficiently,” said Kevin Bromber, CEO of myDevices. “Our partnership with QuaeNet supports the introduction of these solutions in the Canadian market, expanding our reach to help businesses across the globe with easy-to-use finished IoT solutions.”
