

LoRaWAN Certification Test Report

Date: 18rd of May 2016

Location: Espotel Oy, Jyväskylä Test Laboratory, Finland

Responsible Test Engineer: Jukka Kinnunen

Company and Contact Information:

Laird
Zach Hogya
50 S Main Street, Suite 1100
44308, Akron
US

Tested Device: RM186

Firmware version: 18.4.0.26

Hardware version: 1

End-device identifier: LEN DVT 38, DevEUI: 0706050403020100

LoRa Device Class: A

LoRaWAN Specification version: V1.0

Certification requirements: LoRa End Device Certification EU Version1.1

Frequency band(s) tested: 868 MHz

Test Equipment:

Test Software Version: 1.1.5.1
Semtech IOT SX1301 Starter Kit: Gateway software version 3.1.0
Packet forwarder software version 2.1.0

Test Result: **PASS**

Detailed Test Results:

Test Mode activation (Activation by Personalization): **PASS**
Test Mode activation (Over the Air Activation): **PASS**
Test application functionality: **PASS**
Packet Error Rate RX2 SF12: **PASS**
Cryptography: **PASS**
Downlink Window Timing: **PASS**
Frame Sequence Number: **PASS**
Device Status Request: **PASS**
New Channel Request: **PASS**
Confirmed packets: **PASS**
RX Parameter Setup Request: **PASS**
RX timing setup request: **PASS**
Link ADR Request: **PASS**
Packet error rate RX1 Window: **PASS**
Packet error rate RX2 Window: **PASS**

Supported Optional Features:

Adaptive Data Rate (ADR): **Yes**
SF7, BW250 kHz: **Yes**
FSK, 50 kbps: **No**

Remarks: None.

Jukka Kinnunen, Espotel Oy
