One Network has joined the LoRa Alliance, one of the fastest growing technology alliance.

One Network is a leading IIoT (industrial internet of things) focussed organisation offering System Integration, Managed and Distribution Services to organisations in India and across the globe.

By joining LoRa Alliance, the systems integrator company One Network has further strengthened its position within the LPWA (low power wide area) technology space.

The LoRa Alliance is an open, non-profit association with more than 500 member companies is committed to enabling large scale deployment of Low Power Wide Area Networks (LPWAN) IoT through the development and promotion of the LoRaWAN open standard.

Mumbai headquartered One Network has operations spanning UK, Singapore, Middle East and Sri Lanka.

Anuradha Kaur, Managing Director, One Network Consulting states “One Network continues to expand its focus and relevance in the IIoT space and in particular LPWA, and joining the LoRa Alliance is a natural progression for our organisation as we look to further engage with our end customers and partner companies alike. The inherent benefits of LoRaWAN technology make this one of the most viable and cost effective technologies available in the market today.”

The LoRaWAN standard has been deployed by more than 120 major mobile network operators globally, and connectivity is available in more than 140 countries, with continual expansion.

“It is wonderful to welcome a new member from India into the LoRa Alliance, especially as we prepare for the upcoming Member’s Meeting and LoRaWAN Live! day taking place in New Delhi on October 15-17,2019 ,” says Donna Moore, CEO & Chairwoman, LoRa Alliance.

“With the rapid growth of deployments and opportunities in India, we’re excited to learn how One Network is leveraging LoRaWAN technology to successfully achieve their customer’s goals,” said Moore of LoRa Alliance.

The members of LoRa Alliance closely collaborate and share expertise to develop and promote the LoRaWA standard, which is the de facto global standard for secure, carrier-grade IoT LPWAN connectivity. They benefit from a vibrant ecosystem of active contributors offering solutions, products & services, which create new and sustainable business opportunities.

LoRaWAN has the technical flexibility to address a broad range of IoT applications, both static and mobile, and a robust LoRaWAN Certification program to guarantee that devices perform as specified.

One Network and its team is looking forward to an active and fruitful LoRa Alliance membership.

“Joining the LoRa Alliance will help One Network stay in the forefront of the technology’s development and in-turn help us to continue to serve and add value to our ever expanding IIoT customer base,” says Anuradha Kaur, MD at One Network.
