Smart Building

Smart Trackers

Smart Ag Sensor

How Ginjer Platform Works

Ginjer IoT Platform is a fully managed solution that allows you to easily and securely manage IoT data and devices globally at large scale.

Ginjer IoT Platform

IoT Network

Sensor

Analytics
Algorithms for advanced calculations

Data Visualization
Graphical depiction of (real time) sensor data

Device management
Backend tool for the management of device status, remote software deployment and updates

Connectivity & Normalization
Agents and libraries that ensure constant object connectivity and harmonized data formats

Network Management
Communication and provisioning with network server

Database

API

Custom Applications
