

FOR IMMEDIATE RELEASE: 23/03/2020

ALLIOT TECHNOLOGIES BECOME CYBER ESSENTIALS CERTIFIED

Alliot obtain Government and Industry recognised Cyber Security Certification.

Huddersfield, West Yorkshire, UK / March 23rd 2020 – Leading European IoT distributor, Alliot Technologies has been awarded the Cyber Essentials certification. The Government-led assessment strategy confirms Alliot's systems comply with essential cyber security controls.

Launched in 2014, the scheme covers five control categories which cover the most prominent cyber risks organisations face including: firewall security, secure configuration, user access control, malware protection and ensuring all devices, operating systems and software are kept up to date.

Commenting on obtaining the certification, Alliot's Technical Director, Paul Hayes said, "We take every step we can to ensure our data and our customers' data is protected. Cyber Security is incredibly important in IoT through this certification Alliot Partners can ascertain we use safe, secure procedures throughout our company.

"The certification will enable us to open up our business to a wider audience and we look forward to forging new relationships and supporting the growth of IoT in these areas."

NOTES TO EDITOR:

ABOUT ALLIOT TECHNOLOGIES:

Alliot Technologies is Europe's leading distributor of IoT products . Specialising in LoRaWAN and NB-IoT, Alliot provides easy access to the best in class hardware, services and support to customers throughout the UK and Europe. Alliot's vision is to simplify the set-up and ongoing management of IoT devices by providing solutions ready to be interfaced with the users' selected IT structure through device provisioning services and support from an expert technical team. Alliot makes IoT accessible to all, helping partners to develop their solutions from proof of concept to fully scalable commercial solutions, enabling them to take the specific piece they need to bring their projects to life.

ABOUT CYBER ESSENTIALS:

Cyber Essentials is a simple but effective, Government backed scheme that will help you to protect your organisation, whatever its size, against a whole range of the most common cyber attacks.

Cyber attacks come in many shapes and sizes, but the vast majority are very basic in nature, carried out by relatively unskilled individuals. They're the digital equivalent of a thief trying your front door to see if it's unlocked. Our advice is designed to prevent these attacks.
