VERTICAL M2M LAUNCHES ITS IOT SOLUTIONS TO FACILITATE THE RESUMPTION OF POST COVID-19 CONTAINMENT ACTIVITY

Implement a plan to bring back securely workers in premises in this lockdown lift period

Paris, June, 2nd, 2020 - Vertical M2M (www.vertical-m2m.com), a leading Industrial IoT Platform provider with its *CommonSense IoT Platform®* solution, announces today the availability of its new IoT offer to fight against COVID-19.

With "FightCOVID by VERTICAL M2M", we have set-up a portfolio of IoT solutions to support lockdown lift, and employees going back to work in offices, retail locations or plants, with a strong focus on health security, prevention, privacy and management tools :

- FightCOVID-TEMP helps organizations detect body temperature of each employee before entering in any of its locations and comply with all privacy requirements
- FightCOVID-COUNT provides a non-intrusive way to support social distancing in all areas of buildings
- FightCOVID-AIR informs about abnormal indoor air conditions in buildings

Mostly based on LoRAWAN technology, these solutions are delivered as turnkey end-to-end services, including all necessary sensors, installation, configuration, technical support, management platform and global FightCOVID application.

About VERTICAL M2M:

Since 2008, Vertical M2M is an independent telecom software vendor and solution provider specialized in Industrial IoT solutions.

Our core solution, *CommonSense IoT Platform®*, enables Industry players to solve the 3 key painpoints they are facing whenever deploying large-scale IoT projects:

- instantly connect heterogeneous networks of devices (15+ IoT technologies supported including LPWA Sigfox/LoRAWan/NB-IoT, Cellular GSM/SMS/2G/3G/4G and 5G, radio LAN/PAN, Wifi ULP/BLE, wired, BUS, 250+ pre-integrated IoT products...)
- securely and reliably manage fleet of devices with advanced telecom supervision tools and services to ease both installation and commissioning on the field of devices and operation costs, and grant performance of IoT applications
- simplifies access to IoT applications through APIs, a complete design tool (IoT APP STUDIO) for no-code IoT application development, or turnkey ready-to-go applications.

With over 40 customers in 10+ different countries, *CommonSense IoT Platform®* is available as a white-label solution and can be delivered either as a CLOUD-based service or a dedicated infrastructure.
