## Webee joins the LoRa Alliance to foster Next-Gen Industrial IoT adoption NEWS RELEASE

(Sunnyvale, CA – June 9, 2020) – Webee Corporation, announces that they joined the LoRa Alliance® to advance the deployment of IoT and AI Solutions offering a next-gen no-coding toolset for manufacturing, agriculture, and supply chain operations.

The LoRa Alliance is the fastest-growing technology alliance. A non-profit association committed to enabling large scale deployment of Low Power Wide Area Networks (LPWAN) IoT through the development and promotion of the LoRaWAN® open standard.

"Webee is very much looking forward to continuing its progress on bringing visibility, sustainability and efficiency of Industrial Operations through IoT solutions while transmitting data in a secure and efficient way". "LoRaWAN technology has the flexibility for indoor, outdoor and in-transit implementations overcoming structural challenges of many industrial environments in Food, Beverage & Agriculture operations". Says Lucas Funes, CEO at Webee.

"We are very pleased to welcome Webee to the LoRa Alliance," said Donna Moore, CEO and Chairwoman of the LoRa Alliance. "I look forward to its contributions and learning about its innovative approach to developing IoT solutions. As an alliance member, Webee now has access to the largest IoT ecosystem to collaborate, form partnerships and have new opportunities for worldwide exposure to assist in accelerating its business."

Joining the LoRa Alliance's leading ecosystem is one more step for Webee on its commitment to accelerating the adoption of IoT to reduce the environmental impact of industrial operations and achieve sustainability.

**About Webee:**
Webee is a technology company that has developed a unique, no coding visual approach to building complex AI, IoT, and Computer Vision applications for manufacturing, agriculture, and supply chain operations. Based in Silicon Valley, they enable customers to benefit from technology without impacting operations and obtaining an immediate return on investment through a no-coding approach.
