- **Yesterday | Technology Island:** getting data via visits on site & walk-by radio technology
- **Today | Ecosystem**
  - Reliable, powerful infrastructure based on LoRaWAN® serving our traditional business (AMR)
  - IoT infrastructure enabling additional services integrating best of breed 3rd party devices

## Remote read out of consumption data:

- Future-proof in alignment with European Energy Directive (EED)
- High data availability & data quality
- Automation of processes
  - saves tenant's time
  - allows service improvements & less cars on the road

## The future is connected:

- Standardised, open, secure, reliable & scalable
- Deep indoor coverage, no need for repeaters
- Battery based end devices, long-lasting
