Ref.: LR TEMP positive assessment

Dear Sir,

According to LoRa Alliance Certification process description for LoRaWan, the certification by similarity is an option to get the LoRa Alliance Certification.

Based on the information provided by Ela Innovation in their 'CertificationBySimilarityDeclaration_LR_TEMP' document, the device "LR TEMP" meets all requirements specified by the LoRa Alliance; this device is a variant device which design is based on the already LoRaWAN certified "certified "Murata Open MCU Lora Module CMWX1ZZABZ-078".

According to the documentation provided by Ela Innovation the device under certification, has:

- The same LoRa transceiver
- The same LoRa protocol SW version
- The same MCU Core
- The same Clock design and implementation

than the certified integrated module, and the product's application software cannot interfere with the execution of the LoRaWan protocol stack.

Data provided by Ela Innovation comply with LoRa Alliance requirements for certification by similarity.
