VolleyBoast

## Volley Boast, LLC and LORIOT AG partner to bring LoRaWAN®-enabled IOT to the Industrial Sector.

There are a very limited number of industrial grade LoRaWAN® devices that are certified to the standard required to be placed in many industrial settings. The partnership provides a potent combination of tools to industrial customers who require hazardous area certifications and/or testing to UL standards.

Houston, Texas – based Volley Boast, LLC and LORIOT AG announce their partnership in the effort to grow adoption of LoRaWAN® in the industrial space, particular the hydrocarbon sector and other process industries (chemical, food, agricultural, and pharmaceutical).

Volley Boast, LLC is the manufacturer and distributor of the VoBo HL-1 and VoBo GP-1 fully autonomous LoRaWAN® Endpoints. Carrying UL-62368 and CSA C22.2 listings and certified to ANSI/ISA 12.12.01 and CAN/CSA C22.2, the VoBo is well suited for the North American industrial market. The VoBo is truly the Swiss army knife of LoRaWAN® endpoints, enabling proven wired process instrumentation to transmit data wirelessly. In most cases, the VoBo can also provide the power supply for the transmitter.

*“The VoBo together with LORIOT’s network server provides a very attractive combination for the introduction of LoRa technology to the industrial sector, as well as the ability to scale the deployment to take full benefit of the combination. Volley Boast’s VoBo integrates easily with the LORIOT platform, and this will pay dividends for our customers down the road.”* Peter Weidler, President & CEO at Volley Boast.

*“LORIOT was keen to partner with Volley Boast as they offer a unique product that can help existing infrastructures capitalize on legacy sensors that are already installed and convert them into sensors working within the LoRaWAN ecosystem. This will make it easier for companies to utilize their existing setup to begin remote monitoring of their assets and have greater insight into their care and maintenance. LORIOT has always been proud to be at the forefront of LoRa innovations and helping companies have the needed resources to pioneer new technologies.”*

**Julian Studer**, Founder & CEO at LORIOT

## About Volley Boast, LLC

Volley Boast is a designer, manufacturer, and distributor of LoRa devices targeting the industrial market. Our mission is to improve the operational efficiency of our customers through the deployment of cost effective LoRaWAN® networks and our devices.

At Volley Boast, our focus is on zero defects and excellent customer service. Our team works with our customers to ensure a successful deployment.

## About LORIOT AG

LORIOT is a global IoT company providing long-range infrastructure for the Internet of Things.

The core product is a software for scalable, distributed, resilient and secure operation of LoRaWAN® networks and end-to-end applications that dramatically reduces costs and time to market for the end users.

LORIOT offers the network infrastructure to set up, operate and maintain a radio network, integrate sensors and communicate with them over a secure and reliable connection.

Already operating in over 150 countries worldwide, LORIOT is one of the leading LoRaWAN® network solution providers.
