IoT DAY FRANCE
positive impact

VERTICAL M2M, a LoRA Alliance member, is launching a new IoT event on **April, 8th 2022** : IoT DAY France

IoT DAY FRANCE 2022 will be held in Paris as a physical event and will be streamed online as well.

This French-speaking conference will try to showcase positive impact of IoT and how IoT is connected to our everyday life.

For the 2022 edition, we will review some of the hot topics of the French presidential campaign : climate and sustainability, energy transition, security of goods and people or health emergency through IoT use cases, and will also try to provide some insights about hot IoT technologies.

You can register for free on our event's website: https://www.iotdayfrance.org/infos-pratiques-inscriptions/

About Vertical M2M

Vertical M2M (https://www.vertical-m2m.com) _is an independent telecom software vendor and solution provider specialized in industrial IoT solutions._

CommonSense IoT Platform® _enables industrial players to solve the 3 key pain points they are facing whenever deploying large-scale IoT projects :_

- _instantly connect heterogeneous networks of devices (15+ IoT technologies supported including LPWAN LoRAWan/Sigfox/LTE-M/NB-IoT, Cellular GSM/SMS/2G/3G/4G and 5G, radio_

LAN/PAN, Wifi ULP/BLE, wired, BUS, 350+ pre-integrated IoT devices in our **"CommonSense Ready" Devices Catalog**),

- *securely and reliably manage fleet of devices with advanced telecom supervision tools and services (**IoT Device Management** Module). In order to ease installation and commissioning of devices, to optimize operation costs and to grant performance of IoT applications,*
- *accelerate IoT services delivery through a complete design tool (**IoT App Studio** Module) for no-code IoT application development, or turnkey ready-to-go **Off-the-shelves IoT Applications Templates**.*

With over 50 customers in 15+ different countries, CommonSense IoT Platform® is available as a white-label solution and can be delivered either in a SaaS model or in an On Premise model.
