Ref.: AQUARADIO MultiCom positive assessment

Dear Sir,

According to LoRa Alliance Certification process description for LoRaWAN, the certification by similarity is an option to get the LoRa Alliance Certification.

Based on the information provided by INTEGRA Metering in their 'CertificationBySimilarityDeclarationV1_1_AQR MultiCom.pdf' document, the device "AQUARADIO MultiCom" meets all requirements specified by the LoRa Alliance for the EU Band. This device is a variant device which design is based on the already LoRaWAN certified "TOPAS LW".

According to the documentation provided by INTEGRA Metering, the device under certification has:

- The same LoRa transceiver
- The same LoRa protocol SW version
- The same MCU Core
- The same Clock design and implementation

than the already LoRaWAN certified product "TOPAS LW".

Data provided by INTEGRA Metering comply with LoRa Alliance requirements for certification by similarity.
