

LoRaWAN Certification by Similarity

Case A: Module Integration

Applicant:

Company: Moko Technology Ltd.

Location: 4F, Buidling2, Guanghui Technology Park, MinQing Rd., Longhua, Shenzhen, China 518109

Positive Assesment:

Dear Sir,

According to LoRa Alliance Certification process description for LoRaWAN devices detailed in the “Certification By Similarity Declaration V1_1”, the certification by similarity is an option to get the LoRa Alliance Certification.

Based on the information provided by Moko Technology Ltd., the device “LW005-MP” meets all the requirements specified by the LoRa Alliance, this device is a variant device which design is based on the already LoRaWAN certified device “MKL62BA”.

According to the documentation provided by Moko Technology Ltd.. the device under certification, has:

- The same LoRa transceiver
- The same LoRa protocol SW version
- The same MCU Core
- The same Clock design and implementation

than the certified integrated module, and the product’s application software cannot interfere with the execution of the LoRaWAN protocol stack.

Data provided by Moko Technology Ltd. complies with LoRa Alliance requirements for certification by similarity.

DUT information:

Original Certified End-Device		Variant End-Device	
Model Identification:	MKL62BA	Model Identification:	LW005-MP
LoRaWAN Region:	EU868 / US915	LoRaWAN Region:	US915
Supported Class:	Class A	Supported Class:	Class A
Type of DUT:	Module	Type of DUT:	End Device/Sensor
LoRaWAN Version:	1.0.2	LoRaWAN Version:	1.0.2
Hardware Version:	V1.0.0	Hardware Version:	LW005-MP V1.0.0
Firmware Version:	V2.0.1	Firmware Version:	V1.0.4
