

VESTITECH CONSTRUCTION APPLICATION

Unlock Efficiency with Our Comprehensive Construction and Asset Tracking Solution!

OnTrack, simplifies asset management, helping you locate, monitor, and secure equipment and workers across multiple construction sites. Designed to be Your Go-To-Tool for operational efficiency and boost your bottom line result and return of investments.

The OnTrack Solution

OnTrack is an innovative service platform with powerful Out-of-the-Box Applications both for web and mobile. Whether you're managing a vast fleet of devices or just a handful of units the solution will fit your needs. Accessing and managing your data has never been easier, we provide information at your fingertips.

Why Choose VestiTech Solutions?

VestiTech is committed to providing solutions that's intuitive and easy to use. We strive to handle technical complexities behind the scenes allowing you to focus on managing your assets efficiently. OnTrack delivers insights into asset performance while offering the flexibility to adapt to your specific business needs. With VestiTech, you gain a reliable tool that not only supports your operations but helps you optimize them for greater efficiency and profitability.

Key Features:

- **Structure Your Assets for Improved Visibility:**
Efficiently manage your machines and goods per construction site. Creating a light inventory to ensure easy navigation tailored to your specific needs wherever you go.
- **Seamless Device Deployment:**
Hassle-free deployment with our user-friendly mobile application, use the camera to read the QR code of our devices SPURO-X.
- **Geofencing Secured Assets:**
Define virtual geofences to precisely monitor and control asset movements. Receive alerts if tracked objects move outside designated areas. Proactively manage your construction sites.
- **Motion Secured Assets:**
Set all your tracking objects in a Motion Lock Mode in seconds. Meaning motion detection of your selected assets will generate an alarm due to movements.
- **Locate Your Manpower for Safety**
In most cases workers are designated with full visibility over the areas but with an easy check you can ensure that no workers are in the area.
- **Collaborative Mobile App:**
Empower your team with our mobile app, adding notes for things to check out. Enhance communication making on-site operations more efficient.
- **Lifecycle Management for Adaptability:**
Easily manage your tracked objects over time. Add devices, change devices to new objects or just end the tracking.
- **Real-time Alarms, Notifications and Statistics:**
Stay informed with real-time alerts and notifications. Utilize statistics to gain insights into asset usage patterns, enabling data-driven decision-making for enhanced project management.

OnTrack Solution:

OnTrack is a fully integrated web and mobile solution, designed to provide the same powerful features on both platforms. Our goal is to make mobile your go-to tool for efficient operations, giving you real-time access to vital information wherever you are. In today's fast-paced industries, mobile devices play a key role in streamlining work processes. OnTrack ensures that you can easily manage critical tasks on the move, prioritizing the most important activities for your immediate attention.
