

## About Us

GrainSure is an end-to-end solution that places long life, long range devices on silos, giving farmers real-time data on the silo fill level, grain use and predicted days to empty.

### Key Benefits

#### Avoid costly surprises

Make informed decisions with real-time visibility into your silo levels and grain usage.

#### Maintain milk production

Avoid supplementary feed run-outs. Monitor supplementary feed consumption with indicative run-out dates. Order feed in a timely manner.

#### Meet OHS PCBU obligations

Eliminate risks, such as climbing silos.

### Peace of mind with your silos

LoRa

**Install GrainSure  
Device on your silo**

**Receive alerts on  
phone or desktop**

**Take preventative  
measures**

## Customer Testimonials

"I am using the app daily to check my fill levels. It is great that I don't have to climb the silo regularly just to check grain levels manually and has saved me a lots of time. Now I just have to check the fill level on my phone and I know when to order."

**-Josh A**

"You can not manage what you do not measure! As we feed multiple blends at the same time from 3 silos to specific groups throughout the year, focusing on animal health and individual animal performance, to ensure that the best possible financial response is achieved. This system enables me to ensure we never run short."

**-Gavin H**

## Avoid supplementary feed run-outs

No fill level surprises, avoid run out. GrainSure gives you peace of mind.

## Running low & order reminders

Automatic notifications when you're running low and reminders when it's optimal to order.

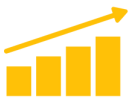

## Key info at your fingertips

Your available feed, daily usage, and predicted run out date at a glance in an easy to use application.

## Your silo anywhere

No more climbing your silo, knocking on the side, or relying on your workers. Check on your silo anytime, anywhere.

## Usage & fill analytics

See your daily usage, indicative run out date, and place optimally timed orders. Avoid ordering too early or too late.

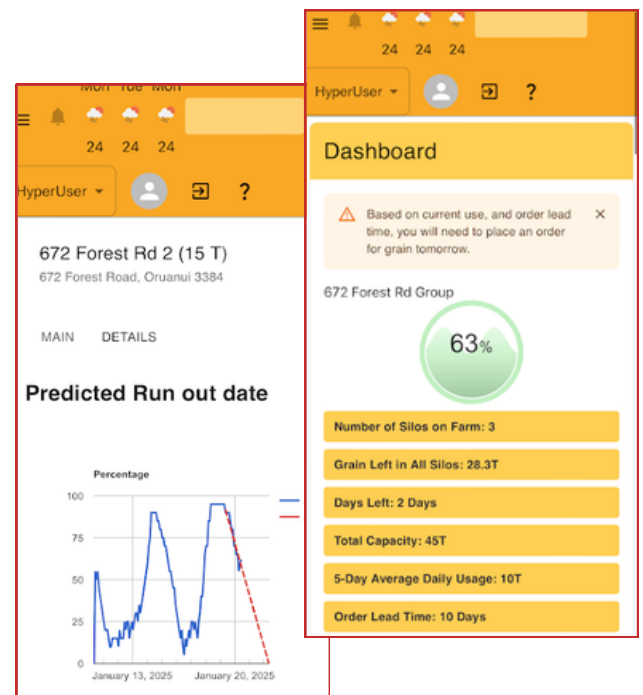

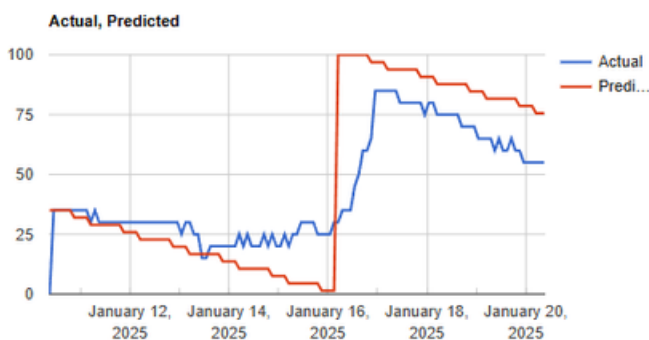

## Made for farmers

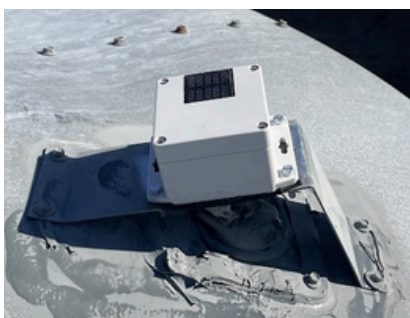

Accurate, robust, and reliable, the GrainSure solution is designed to be affordable for all farmers.

## Intuitive & easy-to-use GrainSure application

- Mobile access to your silo data
- See key information at a glance
- Intelligent predictions on optimal delivery date
- Forecast run out date
- Daily & historical usage
- Monitor any number of silos

## GrainSure Device

- Powerful, robust, affordable, & no-fuss installation
- Compact, unobtrusive, sturdy, fully enclosed & dust-tight
- Advanced low-power radar technology
- Long range LoRaWAN® communication, up to 5km
- Solar & battery gives long-lasting device life
- Works with many types of grain & feed
- Monitor single or groups of silos
- Suitable for silos up to a height limit of 7 metres
