Passage People Counter

Featuring LoRaWAN®

VS350

The VS350 is an exceptional indoor passage people counter that detects and analyzes the flow of people, allowing for optimum space management and usage. Equipped with dual PIR sensors, it offers a high accuracy rate for bi-directional people counting. When combined with the additional temperature sensor, the VS350 can achieve even more potential triggers, increasing its detection capabilities. As a Milesight D2D controller, the VS350 seamlessly communicates with other Milesight D2D devices, establishing more possible connections and paving the way for smoother operations.

With easy configuration and wireless detection, the VS350 facilitates simple deployment and connectivity. Compliant with the Milesight LoRaWAN® gateway and Milesight Development Platform solution, users can know the number of passage people and trigger other sensors or appliances easily via a webpage or mobile App remotely.

VS350 can be used in retails stores, offices, restrooms, etc.

[1] This detection range works at an environment temperature of 20°C. The higher the environment temperature, the smaller the detection range.

[2] The sensitivity of PIRs is greatly influenced by ambient temperature. And the most effective working temperature range is +15 to +32 °C.

[3] Tested under laboratory conditions and for guideline purposes only.
